

The ICS Approach to Incident Response & Forensics

CASE STUDY

INCIDENT RESPONSE /FORENSICS

CHALLENGE

A non-profit legal services organization experienced a need for forensics discovery to provide evidentiary support for a class-action lawsuit. The organization obtained a subpoena for electronic evidence to be obtained and consulted ICS for forensics analysis services.

RESULT

An ICS forensics specialist performed on-site discovery, and within 30 minutes of arrival, obtained critical data in support of the litigation. ICS successfully identified evidence in the accounting systems, internal documents, spreadsheets and email correspondence. Analysis and reporting based on the critical information obtained was instrumental in the successful outcome of the court proceedings.

APPLIED SERVICES

- Electronic Evidence Discovery
- Data Examination and Collection
- Preservation of Data and Evidence
- Analysis and Reporting of Data

What kind of impact would a breach of information security have on your organization? What would you do if it happened today?

ICS offers Incident Response and Forensic assistance from an enterprise perspective following current industry best practices. Understanding that preparation is often the best defense, ICS offers Preparedness Planning Services to help prepare for a threat before a compromise occurs.

The ICS Incident Response program offers extensive services including gap analysis, on-site response, policy development, plan implementation and testing. In the event of an information security emergency the ICS Emergency Response Team is available to aid your organization by identifying the source of the compromise, preserving critical information, and preventing the spread of contamination to other systems and networks. Furthermore, ICS' on-site emergency response efforts will not cease until the incident has been eradicated and the systems and networks have been restored to normal operation.

Incident Response Plan Development from ICS can help protect your enterprise's information infrastructure and significantly minimize the negative impact a security breach can have on your organization.

Forensic Assistance from ICS includes analysis and consultation services to discover, analyze and document information in both proactive and reactive forensic situations. The ICS Emergency Response Team has the knowledge-base and experience needed to achieve successful electronic evidence and data collection, protect evidentiary integrity, and provide factually accurate supporting documentation. In addition, ICS consultants can provide litigation support with expert testimony in the event of court proceedings or prosecution.

Let ICS' Emergency Response Consultants act as your primary response team.
