At ICS, we pride ourselves in our unique ability to integrate comprehensive strategy and cutting edge security into information operations. Learn more at www.ICSInc.com.

Services for State and Local Agencies

In the rapidly changing world of e-government, state and local agencies have an increasing need to integrate comprehensive strategy and cutting edge security into information operations as well as compliance with state and federal regulations such as HIPAA, IRS-1075, NIST, COBIT and/or ISO standards.

Compliance requirements and the looming risk of an IT security breach mean agencies must adopt preemptive strategies to protect their customers' sensitive data – fast and cost effectively. With new information security threats discovered daily, the challenge to meet these stringent demands has become increasingly difficult. In order to contain costs and increase efficiencies, many agencies are considering I.T. consolidation, data leakage protection, and data center optimization projects. While these efforts may help reduce costs and increase security, they require a trusted IT security and consulting firm to ensure success.

The ICS team is vigilant in their approach to information operations and technical security. ICS consultants stay abreast of current legislative requirements, regulatory compliance issues and industry best practices to meet the specialized information security needs of public sector agencies. You can rest assured that ICS has what it takes to ensure secure delivery of your organization's critical information infrastructure and keep operations flowing smoothly.
