At ICS, we pride ourselves in our unique ability to integrate comprehensive strategy and cutting edge security into information operations. Learn more at www.ICSInc.com.

Application Services

Application Development

ICS has a wide range of experience in application development, sustainment, modernization and support. Not only can we design and implement custom applications to enhance business processes and increase operational efficiency, but we are often able to save our clients money by enhancing legacy applications–both standard and proprietary.

Our teams of IT professionals are proficient in technologies such as Java, Oracle, J2EE, .asp, and more. In addition, ICS utilizes a time-tested, proprietary project management methodology (based on PM-Bok) to deliver projects on-time, in-scope, and on-budget.

ICS provides clients the assurance that the applications that we develop and manage will be built on state of the art platforms and secure from ever-evolving security threats.

Application Development Services Include:

- Application Design, Integration, Migration
- Application Sustainment, Maintenance and Support
- Application Updates
- Web Application Development
- Legacy Application Enhancements and Support
- eCommerce Application Development

Platform expertise includes: PHP, Asp.Net, Java, Oracle, Ajax, Jee, J2, Sharepoint, Silverlight, .Net, Ruby On Rails.
