At ICS, we pride ourselves in our unique ability to integrate comprehensive strategy and cutting edge security into information operations. Learn more at www.ICSInc.com.

CyberSecurity | Audit & Assessment

Code Review

ICS is available for code review projects with the goal of identifying security issues and weaknesses in the applications' coding. We are able to conduct a systematic review of applications in scope for code review, which can include in excess of 1,000,000 lines of code.

Examples of programming languages involved are:

- .NET 3.5 framework
- VB.net
- ASP.NET
- C#
- Javascript

By conducting a static review of application code as it exists at the time of the assessment, we are able to provide an assessment of each application's architecture from a security perspective as well as remediation recommendations.
