At ICS, we pride ourselves in our unique ability to integrate comprehensive strategy and cutting edge security into information operations. Learn more at www.ICSInc.com.

Continuity of Operations Plan Testing

Effective Continuity of Operations Planning will help ensure the security of your staff, visitors, and operations in the event of a crisis. In just 60 days, ICS will have your organization prepared to continue operations in virtually any unplanned event – from a minor interruption to a major disaster.

Continuity of Operations Plan (COOP) testing will help validate your existing BCP/COOP plan to ensure the security of your staff, visitors, and operations in the event of a crisis.

ICS' certified business continuity planners will assess your organization's resilience strategies, recovery objectives, business continuity, and crisis management plans. Consider it like a fire drill. Following the BCP/COOP test, you will have a clear understanding of your plans strengths and weaknesses, and will be able to make adjustments BEFORE an emotionally significant event occurs.

If you do not already have a Business Continuity or Continuity of Operations Plan, ICS can create one for you. Contact us today to get started.
